

Amended Claims (Attorney Docket No. LeA 36 544)

1. (Currently amended) Use of a pyrethroid in combination with a nicotinic agonist A method for repelling arthropods from warm-blooded species, locations, and/or materials comprising the step of applying an effective amount of a pyrethroid or pyrethrin in combination with a nicotinic agonist to said warm-blooded species, locations, and/or materials.
2. (Currently amended) Use The method according to Claim 1, wherein the pyrethroid is selected from amongst the following groups:
 - I. Type I pyrethroids
 - II. Type II pyrethroids
 - III. Non-ester-pyrethroids
 - IV. Natural pyrethrins.
3. (Currently amended) Use The method according to Claim 1, wherein the nicotinic agonist is selected from amongst the following groups:
 - V. Neonicotinoids
 - VI. Nithiazine
 - VII. Spinosyns.
4. (Currently amended) Use The method according to Claim 1, wherein said arthropods are selected from for repelling ticks, fleas, midges and/or flies on warm-blooded species.
5. (Currently amended) Method A method for repelling arthropods from warm-blooded species, in which comprising the step of topically applying an effective amount of a pyrethroid or pyrethrin in combination with a nicotinic agonist is applied topically to the warm-blooded animal.
6. (Original) Method for repelling arthropods from locations and materials where they are undesired, in which a pyrethroid or pyrethrin in combination with a nicotinic agonist is applied to the location or the material from which the arthropods are to be repelled.
